PROFESSIONAL SUMMARY

Computer Science undergraduate (B.Tech, 4th Year, CGPA: 8.41) with proven, hands-on experience in full-stack development, machine learning, AI integration, and intelligent workflow automation. Shipped production-ready applications — an AI fitness coach, an AI-powered financial tracker, and a fully automated job-application pipeline driven by Gemini AI and n8n. Completed internships at NRSC (satellite data ML), Visvam.ai (LLM-based product), and Infosys (Blender 3D architecture). Self-driven creative technologist with active Blender 3D projects and a passion for game development. Seeking a role where engineering skill meets real-world impact.

TECHNICAL SKILLS

Languages	C · Java · Python · JavaScript (ES6+) · PHP · C# · SQL
Frontend / MERN	React.js · Node.js · Express.js · MongoDB · JWT Auth · REST APIs
AI / ML	Google Gemini API · Hugging Face Inference API (Mistral 7B) · Scikit-learn · K-Means Clustering · Feature Engineering · EDA
Data & Viz	Pandas · NumPy · Plotly · Ipywidgets · Streamlit
Automation	n8n · Google Drive API · LinkedIn API · Telegram Bot API · Google Sheets API
3D / Design	Blender 4.5 (Modeling, Shading, Rendering, Particles) · Unity (Learning) · DaVinci Resolve
Tools	Git · GitHub · MongoDB Atlas · Streamlit Cloud · VS Code · Antigravity
Spoken Languages	English · Hindi · Spanish · Deutsch · Telugu

EXPERIENCE

AI Developer Intern · Visvam.ai · Gachibowli, TG

Aug 2025 – Sep 2025

- Conceptualized and shipped "Macro," a context-aware AI fitness coach — end-to-end, from initial concept to a live public Streamlit Cloud application.
- Engineered a conversational AI system connecting a Streamlit frontend to the Hugging Face Inference API, powering personalized responses via Mistral 7B LLM.
- Owned the full product lifecycle: requirements → model integration → UI design → cloud deployment on Streamlit Cloud.
- Live app: [Macro – AI Fitness Coach](#)

3D Architecture Modeling Intern · Infosys · Keesara, TG

May 2025 – Jun 2025

- Designed architectural floor plans and 3D structures in Blender, covering the complete pipeline: block-out → modeling → UV unwrap → PBR texturing → lighting → final render.
- Applied Blender techniques across Edit Mode, Layout, Shader/Material Node graphs, and Cycles/EEVEE rendering for photorealistic architectural visualization.
- Delivered multiple textured and lit architectural assets demonstrating proficiency in ambient occlusion, Principled BSDF materials, and HDRI environment lighting.

Machine Learning Intern · NRSC (National Remote Sensing Centre) · Jeedimeta, TG

Jan 2026 – Mar 2026

- Architected an interactive AI-powered analytics platform for NRSC to process and visualize large-scale satellite, sensor, and geospatial distribution datasets.
- Implemented customer and product segmentation using K-Means Clustering with silhouette-based validation, feature engineering, and EDA on remote sensing data.
- Built a real-time analytical dashboard featuring drill-down visualization, KPI monitoring, demand forecasting, and interactive BI reports using Python, Pandas, NumPy, Scikit-learn, Plotly, and Ipywidgets.

PROJECTS

AI-Powered Job Application Automation Pipeline · n8n · Gemini AI · LinkedIn API

Jun 2026

- Built a fully automated job-search pipeline in n8n that pulls my resume from Google Drive, extracts structured data via PDF parser, and queries LinkedIn for roles matching filters set in a Google Sheet.
- Integrated Google Gemini AI as an autonomous agent to calculate a relevance score (resume vs. job description) and generate a personalized cover letter for cold-email outreach to hiring teams.
- Implemented a self-correcting loop: if relevance score falls below threshold, the AI agent iterates and refines; on pass, a Telegram Bot sends a notification with job title, location, experience, score, JD summary, and application URL.
- Technologies: n8n, Gemini AI Agent, LinkedIn Job Search API, Google Drive API, Google Sheets, Telegram Bot API, HTTP Request nodes, PDF extraction.

AI Financial Tracker · MERN Stack · Google Gemini AI

2025

- Built a full-stack personal finance web app with expense logging, EMI tracking, saving goals, JWT authentication, and PDF monthly summary reports.
- Integrated Google Gemini AI to generate context-aware spending insights and investment suggestions based on user transaction history.
- Delivered a clean, responsive React UI backed by MongoDB, with interactive Chart.js visualizations for financial trends.
- GitHub: github.com/Akshad628/ai-finance-tracker

3D Creative Portfolio — Blender 4.5.3 · Blender · Modeling · Shading · Particles

2025 – 2026

- Fantasy Sword: Modeled a high-detail magical sword with a glowing cyan blade using Emission material nodes, procedural crack/crystal textures, animated bloom post-processing, and particle-based lightning bolt effects at the guard.
- Minecraft Architecture Scene: Recreated a voxel-style ancient temple on a floating island with PBR block textures (grass, stone, dirt), Ambient Occlusion baking, and a custom HDRI-lit environment.
- Demonstrated shader graph workflows (Principled BSDF, Emission, Ambient Occlusion bake), UV mapping, and Cycles/EEVEE render pipeline optimization.
- Portfolio assets to be uploaded to GitHub and ArtStation for public showcasing.

EDUCATION

B.Tech — Computer Science & Engineering · Geethanjali College of Engineering & Technology, Keesara, TG

2023 – 2027

Current CGPA: 8.45 / 10 (3rd Year, 2nd Semester)

Intermediate — CBSE (Science Stream) · Kendriya Vidyalaya Picket, Secunderabad, TG

2021 – 2023

Score: 82%

CERTIFICATIONS

- | | |
|--------------------------------------|---|
| ▸ Java & DBMS (SQL) — Oracle | ▸ C Programming — NPTEL |
| ▸ Python — 100 Days Bootcamp — Udemy | ▸ Full-Stack Development (MERN) — Udemy |

EXTRA-CURRICULAR & INTERESTS

- Head, National Entrepreneurship Network (NEN) Chapter — Led entrepreneurship awareness drives, mentorship sessions, and startup ideation workshops for the student community.
- Active learner in 3D modeling (Blender) and game development (Unity) — building self-directed projects combining technical and artistic skills.
- Video editing, graphic design, creative writing, and sketching — strong visual communication sensibility that complements technical work.
